

5V Input 1.5A/2A(Peak) 2.5MHz Synchronous Step-Down Converter

DESCRIPTION

The MT3161 is a 2.5MHz, constant on-time (COT) controlled synchronous step-down converter. It can provide 1.5A continuous and 2A peak output current with input voltage from 2.5V to 6V. The MT3161 output range is from 0.6V to input level, thanks to its 100% duty cycle operation. The constant on-time control scheme simplifies loop compensation and offers excellent load transient response. MT3161 consumes extremely low 15µA quiescent current hence achieves superior light load efficiency. The high gain error amplifier in the control loop provides excellent load and line regulation. Proprietary adaptive on-time helps MT3161 to achieve nearly constant switching frequency across load range. MT3161 has cycle-by-cycle current limit and hiccup mode to protect over-load or short circuit fault conditions.

MT3161 is available in low profile 6 leads QFN 1.1mmx1.1mm and 6 leads SOT563\_6L packages.
