

DESCRIPTION

The MT3570/MT3570A is a high efficiency, 2A current mode synchronous step-down DC/DC converter with a wide input voltage range from 4.5V to 18V. The device integrates high side and low side MOSFETs to achieve high efficiency conversion. The current mode architecture supports fast transient response and internal compensation. The MT3570/MT3570A provides complete fault protection including input under-voltage lockout, output short circuit protection, over current protection, and thermal shutdown. The switching frequency is internally set at 500kHz. MT3570 and MT3570A have different operation modes:

- MT3570 is automatic PSM/PWM mode
- MT3570A is Forced PWM mode

To improve the light load efficiency, MT3570 has proprietary light load power saving mode (PSM) to minimize the switching loss by reducing the switching frequency. The MT3570/MT3570A is available in the SOT23_6L package.
